## WE CLAIM:

(original) A transdermal composition for the relief of pain in a subject comprising:

amitriptyiline, clonidine, ketamine and an anti-inflammatory in a base.

- (canceled)
- (cancelled)
- 4. (original) A transdermal composition as in claim 1, wherein said amitriptyline is between 2% and 4% by weight, preferably 4%.
- 5. (original) A transdermal composition as in claim1, wherein said clonidine is between 0.2% and 0.5% by weight, preferably 0.5%.
- 6. (original) A transdermal composition as in claim 1, further comprising gabapentin.
- 7. (original) A transdermal composition as in claim 6, wherein said gabapentin is between 5% and 15% by weight, preferably 5%.
- 8. (original) A transdermal composition as in claim 1, wherein said ketamine is between 5% and 20% by weight, preferably 15%.
- (original) A transdermal composition as in claim 1, wherein said anti-inflammatory is ketoprofen between 2% and 6% by weight, preferably 5%.
  - 10. (cancelled)
  - 11. (cancelled)

65. (original) A transdermal composition for the relief of pain in a subject comprising:

4% by weight amitriptyiline, 0.5% by weight clonidine, 15% by weight ketamine, and 5% by weight ketoprofen in a base.

- 66. (previously amended) A transdermal composition as in claim 65, further comprising an anti-inflammatory, wherein said anti-inflammatory is ibuprofen between 15% by weight and 22% by weight, preferably 20% by weight.
- 67. (original) A transdermal composition as in claim 65, further comprising 5% by weight gabapentin.
- 68. (previously presented) A transdermal composition for the relief of pain in a subject comprising:

5

- amitriptyiline in amount between 2% and 4% by weight, clonidine in amount between 0.2% and 0.5% by weight, ketamine in an amount between 5% and 20% by weight, an anti-inflammatory, wherein said anti-inflammatory is ketoprofen in an amount between 2% and 6% by weight and a base.
- 69. (previously presented) A transdermal composition as in claim68, wherein said clonidine is about 0.5% by weight.
- 70. (previously presented) A transdermal composition as in claim 68, further comprising gabapentin.
- 71. (previously presented) A transdermal composition as in claim 70, wherein said gabapentin is between 5% and 15% by weight, preferably 5%.
- 72. (previously presented) A transdermal composition as in claim 68, wherein said ketamine is about 15% by weight.

- 73. (previously presented) A transdermal composition as in claim 68, wherein said ketoprofen is about 5% by weight.
- 74. (previously presented) A transdermal composition for the relief of pain in a subject comprising:

amitriptyiline in an amount about 4% by weight, clonidine in an amount about 0.5% by weight, gabapentin in an amount about 5% by weight, ketamine in an amount about 15% by weight, an anti-inflammatory, wherein said anti-inflammatory is ketoprofen in an amount about 5% by weight and a base.

5

75. (previously presented) A transdermal composition for the relief of pain in a subject comprising:

amitriptyiline in amount between 2% and 4% by weight, clonidine in amount between 0.2% and 0.5% by weight, gabapentin in an amount between 5% and 15% by weight, ketamine in an amount between 5% and 20% by weight, an anti-inflammatory, wherein said anti-inflammatory is ketoprofen in an amount between 2% and 6% by weight and a base.

- 76. (previously presented) A transdermal composition as in claim 75, wherein said clonidine is about 0.5% by weight.
- 77. (previously presented) A transdermal composition as in claim 75, wherein said gabapentin is about 5% by weight.
- 78. (previously presented) A transdermal composition as in claim 75, wherein said ketamine is about 15% by weight.

- 79. (previously presented) A transdermal composition as in claim75, wherein said ketoprofen is about 5% by weight.
- 80. (previously presented) A transdermal composition for the relief of pain in a subject comprising: 4% by weight amitriptyiline, 0.5% by weight clonidine, 15% by weight ketamine, 5% by weight ketoprofen and an anti-inflammatory in a base.
- 81. (previously presented) A transdermal composition as in claim 80, wherein said anti-inflammatory is ibup<u>r</u>ofen between 15% by weight and 22% by weight, preferably 20% by weight.
- 82. (previously presented) A transdermal composition as in claim 80, further comprising 5% by weight gabapentin.
- 83. (previously presented) A transdermal composition for the relief of pain in a subject comprising: 4% by weight amitriptyiline, 0.5% by weight clonidine, 5% by weight gabapentin, 15% by weight ketamine, 5% by weight ketoprofen and an anti-inflammatory, wherein said anti-inflammatory is 20% by weight ibuprofen in a base.
